## Duck Season Opens Sept. 15

Shooting for ducks, geese,  
rails, coots and Hungarian  
partridge begins on Thursday  
next, Sept. 15. The season  
for all of the above will termi-  
nate Dec. 14.

The bag limit for ducks is  
30 a day; geese, 15 a day; and  
Hungarian partridge 15 a day.  
Sunday shooting and the  
killing of big game animals  
under 1 year of age are pro-  
hibited.

Special licenses are requir-  
ed for hunting in forest re-  
serves.

Sportsmen, remember the  
farmer is your best friend.  
Ask permission to hunt on his  
land—he will usually meet  
you half way.

Put up his bars and close  
his gates.

Crawl thru, over or under  
his fences without breaking  
these down.

Don't injure or destroy his  
chickens or cattle, or let your  
dog worry these.

Put out your camp fires be-  
fore leaving and protect his  
property and your hunting  
ground.

### Railway Time Table.

Going east—Every morning at  
6.55 except Tuesday,  
Going west—Every night at  
10.36 except Sunday.

## LOCAL NEWS.

Messrs Val Eichenlaub and  
Philip Unterschuetz left on  
Saturday to pursue their studies  
at Concordia Seminary, St  
Louis, Mo. Mr Philip Ulmer  
left on Friday for the same  
destination. Mr Ph Enders,  
a graduate of this institution,  
who has been offered the  
choice of several positions as  
teacher, has not as yet de-  
cided which one to accept.

Mrs D L Barker and fam-  
ily have returned to their  
home at Jasper.

Mr T Clarke, Fort Vermil-  
ion, was a visitor, on Tuesday,  
with Mr James Smith.

The local bank is having an  
electric lighting system in-  
stalled on its premises, the  
work being done by the elec-  
tricians from the Stony Plain  
Hardware.

There will be R. C. services  
in the town hall Sunday morn-  
ing next at 9.

The Ladies' Aid of the local  
United church held a meeting  
last week at the home of Mrs  
(Rev.) Whelen. There was a  
good attendance of members.

Services will be held in  
Wudel's hall on Sunday next,  
Sept. 18, at 7.30 p.m., under  
the auspices of the German  
Baptist Church. Rev F W  
Beuke will conduct the ser-  
vices and the band will render  
musical selections. A hearty  
invitation is extended to all.

Monday's train from Prince  
Rupert was about five hours  
late. It is reported there will  
be a change in the running  
time of the Prince Rupert  
trains, starting Sunday, Sept.  
25th, this service reverting to  
the old three trains a week  
system.

Outside of harvesting oper-  
ations, the popular outdoor  
sport seems to be digging  
wells. Mr A Jacobs, owner of  
the patent water filter, gave  
his recently-installed outfit on  
the Armbruster premises a  
severe test on Saturday, and  
claims the test was entirely  
satisfactory.

The House committee of  
the Skating Club have moved  
the club room to the east side  
of the rink, and intend sink-  
ing a well, to insure a good  
supply of water for the com-  
ing season. The services of  
the well-drillers who have  
been operating at the Arm-  
bruster mill have been engaged,  
and it is hoped the outfit  
will be able to solve the water  
problem so far as the rink is  
concerned. It is proposed to  
spend \$300 on the project.

As the threshing season is  
close on, a meeting of local  
threshers is billed to be held  
in Stony Plain on Saturday  
evening, to set the threshing  
rate for the season. There is  
a probability that the rates in  
force in 1926 will prevail this  
year.

M M Mecklenburg, the  
well known optical specialist,  
will be at the Royal Hotel,  
Stony Plain, on Thursday,  
October 6th. See him and  
see well.

Found, auto number plate.  
Apply Sun Office.

## Wild Life Of Western Canada

Not least among the attractions that Western Canada has for many people, whether permanent resident, tourist or sportsman, is the abundance and variety of its wild life, and now that the hunting season is at hand it is opportune to make something more than a passing reference to the value of this great asset to all of our Western Provinces.

Judged from any and all standpoints the wild duck and geese, prairie chicken, partridge, and other game birds are of immense value to this country. They constitute a picturesque feature of life on the prairies and are a constant source of delight to the lover of nature. What greater pleasure can be had than to witness the flight of duck in the early dawn or as the sun sinks to rest? A man must be of a very stolid nature indeed who does not get a thrill as he watches them winging their way across the sky.

To the hunter our game birds offer the best of opportunities for the display of the keenest marksmanship, coupled with the best sportsmanlike qualities. And, finally, they provide a welcome addition to our food supply—a delicacy appreciated by all.

Later in the season comes the opportunity for the big game hunter to match his craft and skill with the deer and moose. In a word, the wild life of the West is a drawing card for thousands of people. Without these game birds and animals the West would not be the West which attracts and holds.

But human nature being what it is, it became necessary for Governments by legal enactments to protect these friends of man from man himself. As a result, the open season for shooting has had to be curtailed, and the size of "bags" greatly restricted in order to save birds and animals from extermination. And it is only through the strict observance of these laws, and a rigid compliance with all regulations, that the further curtailment of privileges now enjoyed can be avoided. Laws have been passed and regulations are enforced by Governments, not for the purpose of depriving hunters and citizens generally of the privilege of shooting, but in their own interests that it may be preserved and continued to them.

There are still some individuals in this world, who wrongly style themselves "sportsmen," who consider it sport and something to be proud of and boast about to shoot an inordinately large number of birds in a day or a season. These individuals revel in having their photographs taken, gun in hand, and with their "kill" displayed around them. The real sportsman, and the true citizen, looks upon all such exhibitions with regret and a loathing contempt. It is one thing to shoot for food, or for an hour or two of the real thrill that comes to the true hunter, but quite another to engage in a worse than useless orgy of wanton slaughter. The man who will kill and kill for the mere joy of killing and in order that he may boast of his "bag" is no sportsman; on the contrary, he is the enemy of all sportsmen, and, in the final analysis, his own enemy. In the language of the old fable, he is destroying the goose that lays the golden eggs.

The writer of this article has no desire to preach; he is not a clergyman. But he would, even on the arid grounds of self-interest, not to mention more lofty motives, urge all the people of Western Canada to constitute themselves unofficial game guardians,—to fully and loyally observe the spirit and letter of the game laws themselves, and see to it that other people do likewise.

A Professor of Psychology claims that brown eyes are an indication of a weak will. He might also add that black eyes are an indication of a weak defense.—Judge.

According to British research experts, London's smoke cloud extends nearly two-thirds of the beneficial ultra-violet rays of sunlight from that city.

Dial numbers have been converted into raised numbers to enable blind persons to tune to different stations on the radio receiver.

## CHILDREN CRY FOR

**Fletcher's CASTORIA**

MOTHER—Fletcher's Castoria is especially prepared to relieve infants in arms and children all ages of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food, giving healthy and natural sleep.

To avoid imitations, always look for the signature of *W. C. Fletcher*. Absolutely Harmless—No Opium. Physicians everywhere recommend it.

### North Best For Whites

Tropics Only Suitable For Colored Race Says Scientist

The white races must eventually turn toward the polar regions in search of new homes, Dr. R. N. R. Brown, president of the Geographical section, told the British Association for the Advancement of Science at a meeting in Leeds, England.

"There is no real evidence that the whites are suited for permanent residence in the tropics," Dr. Brown declared. "All evidence that is conclusive suggests that the colored races will eventually occupy the warm lands."

"Eventually the tide of white settlement will definitely set northward, even to the Arctic sea, and its flood destroy the present inhabitants."

### Removes Touchy Corns Brings Solid Comfort

Acts like magic—takes out all the pain—makes aching corns feel comfortable in a few seconds. That's how Putnam's Corn Extract acts. You will not be disappointed with "Putnam's"—it never fails to lift out corns or remove painful calluses. Get "Putnam's" Extract from your druggist. Refuse a substitute.

### 71-Year-Old Triplets

Abraham, Isaac and Jacob Waggoner, seventy-one year old old triplets, claim the distinction of being the oldest triplets in Tennessee and possibly in the United States. They have lived all their lives with ten miles of one another, have never been ill enough to require a doctor's services and do not smoke, chew or drink.

### MADE HER BABY PLUMP AND WELL

Nothing makes a mother more grateful than a benefit conferred upon her child. Mothers everywhere who have used Baby's Own Tablets for their children react in enthusiastic terms of them. For instance, Mrs. Catherine Lewis, Three Rivers, Que., writes:—"Baby's Own Tablets are a wonderful medicine for little ones. They never fail to regulate the baby's stomach and bowels, and make him plump and well. I always keep a box of the Tablets in the house and would advise all mothers to do likewise." Most of the ordinary ailments of childhood—croup, colds, coughs, stomach and bowels, and can be quickly banished by Baby's Own Tablets. These Tablets relieve constipation and indigestion, break up colds and simple fever, expel worms, allay teething pains and promote healthy sleep. They are guaranteed to be free from injurious drugs and are safe even for the youngest and most delicate child. The Tablets are sold by medicine dealers or by mail at 25c. a box from The Dr. Williams' Medicine Co., Brockville, Ont.

In Abyssinia, a telephone message must first be written and handed to the operator, who in turn, shouts it into the transmitter, no one else being permitted to use the instrument.

Worms in children work havoc. These pests attack the tender lining of the intestines and, if left to pursue their ravages, will ultimately perforate the wall, because these worms are of the hook variety that cling to and feed upon the interior surfaces. Miller's Worm Powders will not only exterminate these worms, of whatever variety, but will serve to repair the injury they have done.

### French Scientist Poorly Paid

Eduard Branly Has Worked Fifty Years Under Trying Conditions

Eduard Branly is cited by newspapers as trying to solve the struggle of French scientists to work under miserable conditions. Branly is inventor of the condenser. France calls him the "father of the wireless."

Branly has as his only assistant in a ramshackle "laboratory" an aged woman who does out a living by doing extra hours of housework in other homes. This maid of all work is now the scientist's "laboratory chief." She was intelligent and the professor trained her in his work.

For fifty years Branly has worked under these conditions, drawing a salary of about \$75 a month as professor and supporting his family by occasional practice as a physician. These facts are told by French papers as illustrating the need to pay well men who give their lives to science.

Minard's Liniment eases sore feet.

W. N. U. 1928

### Operates Restaurant 'Plane

Added To Paris-London Service By French Aviation Company

A "restaurant plane" has been placed in daily operation on the air line between Paris and London by a French aviation company, the Air-Tun, according to advices to the Department of Commerce from W. H. Kelley, automotive trade commissioner to Etropole.

A cold luncheon is served, including hors d'oeuvres, lobster, duck, veal, ham, salad, cheese, fruits and coffee, with wine, water or tea. In the near future an electric stove will be installed for preparing warm food.

The plane carries a pilot, a radio operator, cook, waiter and ten passengers and their baggage. It is one of the fastest in Europe, covering 335 miles in two hours.

### Another Evolution Theory

British Zoologist Thinks Man Developed From Jelly Fish

If you are musical, like dancing, or have "poetical instincts, you may thank your jelly fish progenitors of aeons ago, in the opinion of Dr. G. P. Bidder, British Zoologist. Dr. Bidder outlined his theory that man developed from the lowly jelly fish in an address at Leeds, England, before the British Association for the Advancement of Science, and added:

"Our appreciation of dancing, poetry and fine music is due to the metabolic rhythm inherited from our flagellate forefathers, and shows that we are still flagellates at heart."

### The Good Natural Scotch

The Scotch are all right. But the Scotchman is thick-skinned and he can take a joke, and therefore the jokes about him grow apace. Jokes about the Jews and the Irish have virtually been ruled out of our theatre because of organized protest. Not so with jokes about the Scotch. The Scotchman chuckles at the stories about his penuriousness. He laughs at those excellent golf stories which usually permit him only one ball in his bag. And, after all, it is better to laugh with the people who laugh at you.

### Supports Bay Route

Endure support for the opening of the Hudson Bay route is given by the St. John Telegraph-Journal, one of the most influential newspapers of the Maritime provinces. "In fairness to the west," it says, "attempts to discredit the Bay route should cease. The plan is going through. It should be expedited. Let us hope that the results will fully meet the expectations of Manitoba and Saskatchewan. They have made a resolute fight for what they believed to be their due, and the rest of the country should wish them all good luck."

Used by physicians—Minard's Liniment.

### Flour Exports

During the first six months of 1927, 16,319,328 barrels of flour were manufactured in Canada, a little more than half of which was exported from the country. In the twelve months ended June 30th, Canada exported \$65,101,452. Exports to the United Kingdom increased from 2,519,242 barrels worth \$21,693,502 in 1926 to 3,552,755 barrels worth \$24,865,185 in 1927.

Three Daily **SCOTT'S EMULSION** is of Great Value to a nursing Mother

### Aviation Enters New Era

The recent inauguration of a country-wide system of air express marks the passage of aviation from its present era of stunt stuff with its inevitable high cost in human life, to the comparatively safe and sound basis of every day commercial use, in the opinion of R. E. M. Cowie, president of the American Railway Express Company.

Like a Grip at the Throat. For a disease that is not classed as fatal there is probably none which causes more terrible suffering than asthma. Sleep is impossible, the sufferer becomes exhausted and finally, though the attack passes, is left in unceasing dread of its return. Dr. J. D. Kellogg's Asthma Remedy is a wonderful remedial agent. It immediately relieves the restricted air passages as thousands can testify. It is sold by druggists everywhere.

A robin built a nest on a mop on the back porch of the home of a Chicago woman. She secured another mop and lent the robin undisturbed until a family of six were reared.

The Oil Of The People.—Many oils have come and gone, but Dr. Thomas' Electric Oil continues to maintain its position and increase its popularity of usefulness each year. Its sterling qualities have brought it to the front and kept it there, and it can truly be called the oil of the people. Thousands have benefited by it and would use no other preparation.

A French watchmaker has invented a watch that tells time without hands. A moving dial turns inside a stationary rim. The minutes appear on the rim and the hour is shown through an opening in the dial.

Minard's Liniment relieves backache.

Driving became dangerous in the old days when the horse felt his oats! now it's when the driver feels his rye.

The speediest bacteria can travel only about four inches in 15 minutes.

**Genuine ASPIRIN**

**BAYER**

Proved safe by millions and prescribed by physicians for

Colds Headache Neuritis Lumbago  
Pain Neuralgia Toothache Rheumatism

**DOES NOT AFFECT THE HEART**

**Safe**

Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 12 tablets. Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered) in Canada of the Bayer Company. It is well known that the Bayer Company is the only manufacturer of Aspirin in Canada. The Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

## Railway Commission Ruling Is Cause Of Worry To American Railway Interests

The Washington Post, under the caption "Canada's Unkind Cut," says: "The Canadian railway commission has apparently put a crimp into the transportation interest of the Great Lakes and the American railroads that join the lakes to the seaboard. Incidentally it would appear that the order fixing freight rates from the great grain fields of the Canadian northwest to Montreal is likely to result in diverting 25,000,000 bushels of export grain from American seaports to the ships that make Montreal, instead of New York, Boston and Baltimore, their western terminal."

"The Canadian commission ordered a reduction of the rate on grain from 31.5 cents per hundred pounds to 18.5 cents from the head of the lakes to Montreal and the Canadian seaboard. This reduction of the established rates of nearly 40 per cent. naturally caused consternation in American shipping circles and some means of retaliating is being sought."

Not only will this reduction materially affect the earnings of the ships and railroads so largely interested in the commerce of the whole lake region, but it may have a decided effect upon the milling interests of Minnesota. It has been the custom for many years for the people of Manitoba to ship their hard wheat to Minnesota and Duluth to be ground into flour for export. This grain is admitted free of duty under bond, and the flour has been transported over railroads or by water through Buffalo to Atlantic ports for export.

"Should the order of the Canadian commission result in diverting Canadian wheat and other grains through the elevators at Montreal instead of Buffalo, the effect on the earnings of the transportation lines on this side of the border will be very damaging. The grain interests will endeavor to induce American railroads to appeal to the Interstate commerce commission for permission to meet the Canadian cut."

## Marking Highways In Saskatchewan

Men Working From Boundaries To Centre Of Province

Two parties of men, working from the Manitoba and Alberta boundaries toward the centre of the province, have been assigned by the Provincial Department of Highways to the task of blazing 5,000 miles of provincial highways with new signs. The work will be carried on as long as possible this season, and it is hoped that next summer will see its completion. Each highway will be given a number, which will appear on the signs now being put up, and also in roadmaps. The road signs are designed for visibility, and will consist of a target on a steel standard bearing in addition to the geographical data the abbreviation "Sask." and the Provincial coat of arms. It is understood that Manitoba has undertaken a similar plan, and that Alberta will follow shortly.

## Latest Use For X-Rays

Detects Solid Materials In Rags Used For Making Paper

New uses are always being found for X-Rays. One of the latest is that of searching for buttons and other solid materials in piles of rags that are to be used for paper-making. Serious damage to the pulping machine is likely if buttons, hooks, eyes, and such like are not removed from the pulp. To prevent this, endless hands convey the rags over an X-ray tube, where the solid materials are detected by fluorescent screens in the X-ray outfit.

## Noise Making Ears Larger

If you have large ears and they are getting bigger, this may be the cause. Dr. Pfeiffer, Vienna, ear specialist, says the noise and clamor of modern city life are producing a new type of elephant-eared men and women and says he can confirm this by measurements of his patients' ears for the last 20 years. If city noises are the cause, why should ears grow larger when what humanity needs is something that will muffle sound?

W. T. U. 1924

## World's Record In Egg Laying

White Leghorn Belonging To University Of British Columbia Is World Beater

The Superintendent of the Dominion Experimental Farm at Agassiz, B.C., Mr. E. H. Hicks, B.S.A., claims several world's records for egg laying at the farm. In order that these claims may be exactly understood the official report for the year 1923 is here quoted almost verbatim. After saying that previously 215 eggs per bird was regarded as high as could reasonably be looked for, the report continues: "The contest just completed finished up with an average of 231 eggs per bird, that is 108,226 eggs from 469 birds, which is considered to be a world's record. Apart from this several other world's records were made both as to peak production (ten birds to a pen) and from individual birds. The pen that won the contest with a score of 2,057.5 points established a world's record. The pen which scored highest for egg production with a total of 2,246 eggs or an average of 294 eggs per bird made a world's record for number of eggs. The Harrold cock that finished in the lead with a total of 409 points with 325 eggs also made a world's record for points, all breeds. The outstanding record of all, however, goes to a B.C. White Leghorn belonging to the University of British Columbia, namely 351 eggs in 394 days."

Points are awarded on the following basis: one point for each egg averaging 24 ounces to the dozen; one-tenth of a point deducted for each ounce that averages less than 24 to the dozen; bonus of one-tenth of a point for each ounce of eggs that average more than 24 to the dozen. Eggs averaging more than 27 ounces to the dozen are regarded as just averaging that number. Eggs averaging less than 20 ounces to the dozen, exceedingly badly shaped eggs, and soft-shelled eggs are not credited.

When a new girl comes to a small town all the boys sit up and take notice.

One doesn't need to be an aviator to know the meaning of air pockets. Just ask the returning vacationist.

## Canada Is Building Up And Developing Trade Into Remote Corners of the Earth

### When Pockets Are Dangerous

Unless Kept Clean Will Collect Germs Says Bacteriologist

At one time of the many thousands of people who catch cold after cold, or who are hardly ever free from troublesome catarrh, or some similar ailment?

If so, you had better empty your pockets, brush the linings thoroughly, and then have them washed with a good disinfectant.

A bacteriologist has been examining the stuff, dust, dirt, and so on, contained in a man's pockets, and he identified seventeen varieties of germs and estimated the total number at 5,000,000.

In the dust was the deadly poison veridigis, rubbed from copper coins by friction; phosphorus from matches; nicotine in powder, and other harmful substances. Of the germs that produce catarrh there were thousands!

Whenever a handkerchief picked up a few of these germs they were inhaled, and if the conditions were favorable to them, the owner of the handkerchief got another attack of catarrh.

That the comparatively heavy veridigis remained in the bottom of the lining was a blessing. Wiped on to the lips the result would have been serious.

When we wonder where we caught this or that ailment we need not in many cases go farther than our own pockets. Fluff—especially if it becomes damp through rain—is a rearing ground for germs.

The moral is obvious—keep your pockets clean.

No really good gramophone is ashamed of its own record.

Some men actually believe that pointers will worth considering.

### Feeding Market Hogs

Feeding Has a Distinct Influence On the Quality Of Finished Market Animal

A large proportion of pigs marketed fall in one or more respects to comply with the standard required by either the pork butcher or the bacon curer, a frequent fault being over-fatness. Often this is due to unsuitable breeds and breeding, but live stock men all admit that feeding, whether it be bad or good has a very distinct influence on the quality of the finished market animal. In fact some feeders go so far as to claim that proper feeding methods are of equal importance to correct breeding.

In order that hog raisers may have easily available information on proper methods of feeding the Dominion Animal Husbandman has issued a pamphlet on "Breeding and Feeding the Market Hog" which may be obtained from the Publications Branch, Department of Agriculture, Ottawa. It contains balanced rations, injurious substitutes, deficient rations, over or under feeding, lack of intelligent understanding of nutritional requirements generally, all exert a particularly powerful influence during the early growing period as affecting later development. For instance the demand of the bacon curer is for small well finished, fine-boned carcasses, with a proportion of lean and a low proportion of offal. To obtain these the feeding must be correctly carried out all through the development of the animal. The use of inferior feeding stuffs, or the misuse of suitable foods, will cause otherwise excellent carcasses to turn out practically worthless or to be reduced seriously in value.

### An Attractive New Frock

This charming frock is shown in View A fashioned of lace and satin, and in View B of figured material. The skirt and bodice are gathered at the top of the front panel. Bands of ribbon form an effective trimming on the bodice and long gathered sleeves, and is also used for the binding on the V neck and top of the vestee. No. 1649 is in sizes 24, 26, 28, 30 and 32 inches bust. View A, size 30, requires 2 1/2 yards 39-inch lace, and 1 1/2 yards 39-inch material. View B, size 30, requires 2 1/2 yards 39-inch, or 3 yards 54-inch material; 1 1/2 yards 3-inch ribbon. Price 25 cents the pattern.

## Canadian National Running Trophy

As a means of fostering interest in middle distance running in Canada, the Canadian National Railways Recreation League has presented to the Amateur Athletic Union of Canada the above handsome bronze statuette and medals. The trophy is a handsome bronze statuette, on a base of native Canadian wood. It is a perpetual award and will be held for one year by the winner of the one-mile race at the Dominion Championship meet at Toronto. The runners

who are first, second and third will receive gold, silver and bronze medals respectively. The presentation of the trophy and medals was made to the A.A.U. of C. on behalf of Canadian National officers and employees who are members of the Canadian National Recreation League of which Sir Henry W. Thornton is patron and A. J. Hills, president. The League is representative of Canadian National sports activities from Coast to Coast in Canada.

So vast and interlocked are the ramifications of world trade that the dislocation precipitated by the great war affected every civilized people, even the more primitive races could not escape its repercussions. Volumes would be needed to itemize the processes required to feed, clothe, amuse and house the human denizens of this modern age. Trade is ubiquitous in scope and world-wide in its ramifications. Canada is developing her share, as trade figures will show, but few people have any intimate idea how difficult it is to build up a substantial foreign business.

The name of "New Zealand" displayed against a fern leaf is the national brand used to identify New Zealand's excellent butter and cheese in the export trade. Butter and cheese bearing a mark sufficiently like New Zealand's to deceive the careless recently came on the market. They were shipped from the Argentine, and New Zealand is discussing the subject with the government of the South American republic.

Canadian hops go to England and are to be sent to the Australian market this season. British Columbia ships canned fish to the remotest corners of the earth; California has a similar wide distribution of preserved fruit. Forty Jersey holders were shipped from Vancouver to Shanghai recently. The Guernsey bull, Echot of Myrtle Place, took first prize at the annual show on the Isle of Guernsey and promptly was bought by a Detroit man. Spits of clothing made in New York state are sold in England.

A refrigeration service carries fruits and vegetables from southwestern America; Brazil bought 60,000 tons of potatoes from British Columbia in 1923. The same province is sending apples to South Africa, China, Sweden, Norway, Germany and Denmark. Great Britain and the United States. New York and Chicago are ready customers. South Africa and the west coast of South America compete in New York fruit market at certain seasons.

In normal times of peace, there is hardly such a thing as a nation being self-contained. One nation depends upon another, and if the world is undisturbed for fifty or more years by conflict, this interdependence will increase. Canada, in wheat alone, not to speak of several essential minerals, is contributing much to the needs of the world in most substantial measure. By this token, we are far from a backward people.

### Meaning Has Changed

Word "Match" Came From Greek For Lamp Wick

Originally, the word came from the Greek for a wick of a lamp or candle, but in the process of centuries it has changed its meaning several times. Thus we had the match of the old, match-lock gun, a sort of long wick arrangement along which a spark gradually crept.

Our very earliest pocket matches were really a glorification of wicks, being little flat shavings of wood which were "fired" by the aid of flint and steel and tinder. The next stage was when we began to dip these matches in chemicals, and so got the friction match. The friction match soon put out of the field all the oldest clumsy complicated ways of getting a light, and soon we dropped the "friction" from the term and got our modern "match."

### Walnut Becomes Expensive

In an article on Sir William Muck's black walnut plantation, estimated at \$2,000,000 when it matures a Toronto writer says: "One well-grown walnut will yield about 300 feet and at a fair estimate is worth \$100. Many old log barns and rail fences in Ontario are being torn down for the small amount of walnut in them. In time the price will be undoubtedly doubled or trebled."

### Smallest Cafe Closes

The smallest restaurant in the world has closed its financial affairs after years of success. It operated in a room three feet by eight, and accommodated only one customer at a time.

## WORLD HAPPENINGS BRIEFLY TOLD

Seeing New York by air is cheaper than by taxi. The same route covered by an airplane at a cost of \$2 will run up a taxi bill of \$6.10.

Wayne B. Wheeler, general counsel of the anti-alcohol league of America, died at Battle Creek sanitarium recently, due to a heart attack.

Immigration to Canada for the month of July, 1927, totalled 12,238, made up of 5,432 from the British Isles, 2,101 from the United States and 5,155 from other countries.

Ernst Vierkoetter, who won the Canadian National Exhibition marathon swim is now planning a vaudeville tour, after which he will likely enter motion pictures.

The purchase of 16 quarter sections of land, involving \$56,235, was the result of the visit of a party of land-seekers from Nebraska and Kansas to the Eston, Tynes Valley and Salpe, Lake districts in Saskatchewan, recently.

Communal rioting at Nagpur, capital of the central provinces, British India, resulting in the death of 15 persons, is reported by the Bombay correspondent of The Exchange Telegraph. Many families are leaving the city, fearing renewal of the troubles.

Commander Richard E. Byrd states that he has planned to leave New York next August on his South Pole expedition and that Floyd Bennett, who accompanied him on his flight to the North Pole, would be second in command of the party.

The Aero Club Committee, after hearing Jean Calzillo, French aviator, who recently claimed to have made an ascent of 12,000 metres (42,651 feet), decided, unanimously not to register his record of August 23, and to disqualify Calzillo for life.

M. Briand, foreign minister, acting as president of the allied conference of ambassadors, has formally notified M. Stresemann, Germany, that the allied army of occupation in the Rhine land will be reduced from 70,000 to 60,000 men. Details of the reductions will be announced later.

## Mothers, Your Health Must Be Up to Par

—Evans Studio  
London, Ont.—"During one of my expectant periods I was so weak and nervous I could not get around, my head ached, I felt heavy all the time and suffered with sick stomach. I was advised to take Dr. Pierce's Favorite Prescription, and after I began taking it I got along fine. It relieved me of all the bad effects, made me well and strong, my nerves were good, and I kept so well I could do all my own work and I had a fine healthy baby."  
"I also find that Dr. Pierce's Pleasant Pellets keep the stomach, liver and bowels in perfect working order, and never cause distress."—James Campbell, 109 Inverness St. (picture above).  
Send 10c to Dr. Pierce's Laboratory in Bridgeport, Ont., if you desire a trial box. Favorite Prescription tablets or Pleasant Pellets.

W. N. U. 1699

### New Narcotic Gas

Brings Deep Sleep and Has No After Effects

At the last meeting of the Medical Society in Berlin, Professor Unger described his experience with the new narcotic gas technically known as E. 107. Up to the present it has been customary to use either ether or chloroform to produce unconsciousness in surgical cases. Gauss recently introduced another means, a pure gas entitled markylen, made of purified acetylene, but for various reasons its use has not become general.

It was not any danger connected with the use of ether or chloroform that induced the attempt to produce E. 107, but the discomfort connected with their use. Many sick people are unpleasantly affected by ether or chloroform; the feel of the mask, the choking sensation, the knowledge that they are being put to sleep by force, combine to make them nervous, on awakening they are plagued with thirst.

E. 107 does not have to be breathed in. It is applied by means of a syringe and works from the intestines. In eight to fifteen minutes the patient falls into a natural sleep, lasting for several hours, and feels no after effects on awakening. It is a sleep of unconsciousness during which no pain can be felt and muscles are relaxed. The drug has no effect upon the heart, but sometimes affects the breathing.

Other physicians related their experiences to the society. About a thousand cases of operations with E. 107 were reported, but the medical profession does not consider it possible to form a definite opinion as to the value of the drug until far more evidence had been collected. For the present the use of E. 107 therefore has been confined to a few great surgical stations for continued experiments.

### Goes To Argentina

W. J. Jackman, of Clover Bar, Alberta, is now on his way to Buenos Ayres, Argentina, where he will make his headquarters as representative of the Canadian Wheat Pool for South America. Mr. Jackman has been on the board of directors for the Alberta Wheat Pool since the formation of that organization. He has resided in Alberta for over 32 years, coming in 1905 from the old country to farm. During his residence in Alberta he has always taken an active interest in farmers' organizations. His intimate knowledge of pool operations, his organizing and business ability, and his knowledge of the Spanish language equip Mr. Jackman to be a splendid representative of the Canadian Pool in South America.

### Winnipeg Newspaper Union

Man should bore holes to get heat from the interior of the earth instead of destroying a highly elaborate substance like coal, the British Association of Service was told by J. J. Hodgson, mechanical engineer.

He declared that heat stored in great spheres inside the earth is at least 30,000,000 times that available in the world's coal reserve. Hot rocks are found, he said, only about 33 miles below the surface and much nearer in volcanic areas.

The speaker said he advocated drilling shafts five miles apart. Workers boring the holes would be protected by heat proof suits, including liquid air containers to supply cool dry air.

The lecturer estimated that a cubic mile of hot rock would yield as much heat as burning 200,000,000 tons of coal.

Make Glue From Fish Scales

Fish glue prepared from scales by natives of the Congo region in Africa, is used for waterproofing their clothes as well as canoes. Popular Mechanics magazine says: The natives prepare the glue by mixing the scales of fish with twigs of various plants and boiling the mixture. The materials to be waterproofed are then dipped in this glue and allowed to dry.

### A New Frock For School or Playtime

Smartly simple is this chic frock having a two-piece shirt skirted to the bodice. In View A the high neck is finished with a round collar and the long sleeves are gathered to narrow wrist-bands, while in View B contrasting material is used for the patch-pockets, overfacing on the square neck and cuffs finishing the short sleeves. No. 1642 is in sizes 4, 6, 8 and 10 years. Size 6 requires 1 1/2 yards 36-inch, or 1 1/4 yards 54-inch material, and 1/4 yard additional 26-inch contrasting for View B. Price 20 cents the pattern.

Most men are willing to start something for the sake of an argument.

"It's the man with the smile that wins."

"Sure. That's why he smiles."

### Heat Stored Underground

Man Should Bore Holes In Earth To Obtain Heat Supply

Man should bore holes to get heat from the interior of the earth instead of destroying a highly elaborate substance like coal, the British Association of Service was told by J. J. Hodgson, mechanical engineer.

He declared that heat stored in great spheres inside the earth is at least 30,000,000 times that available in the world's coal reserve. Hot rocks are found, he said, only about 33 miles below the surface and much nearer in volcanic areas.

The speaker said he advocated drilling shafts five miles apart. Workers boring the holes would be protected by heat proof suits, including liquid air containers to supply cool dry air.

The lecturer estimated that a cubic mile of hot rock would yield as much heat as burning 200,000,000 tons of coal.

Make Glue From Fish Scales

Fish glue prepared from scales by natives of the Congo region in Africa, is used for waterproofing their clothes as well as canoes. Popular Mechanics magazine says: The natives prepare the glue by mixing the scales of fish with twigs of various plants and boiling the mixture. The materials to be waterproofed are then dipped in this glue and allowed to dry.

### BRITISH SCHOOL BOYS VISIT CANADA

A party of British public school boys arrived in Canada on Saturday on the White Star liner *Albertic* to make a tour of Montreal, Ottawa, Toronto, Algonquin Park and New York, to become better acquainted with Canadian boys and to understand the points of view of other nations by means of personal friendship. They are in charge of Rev. R. F. Fowler-Farrow, M.A., F.R.G.S., of Cambridge University, third from the left in the front row, and Rev. Howard J. Rose, M.A., of Oxford University, on the extreme right.

### SUNDAY SCHOOL LESSON

SEPTEMBER 18

#### THE KINGDOM DIVIDED

Golden Text: "Pride goeth before destruction, and a haughty spirit before a fall."—Proverbs 16:18.

Lesson: 1 Kings 12:1-24.

Devotional Reading: Proverbs 1:20-26.

#### Explanations and Comments

1. The Request of the People, verses 1-5. Rehoboam, Solomon's successor, went to Shechem and there the people, through Jeroboam the son of Nebat asked for a reduction of their burdens. "Thy father made our yoke grievous," they said. The "yoke" was an emblem of servitude; compare Jesus' words in Matthew 11:30. The people had been heavily taxed by Solomon, and forced labor had been required. Recall Samuel's prophecy when the people demanded a king, 1 Samuel 8:10-18, and read 1 Kings 4:7, 22-26; 5:11-18, to see how Solomon's extravagant court and his immense buildings must have impoverished the people. "Now therefore make that the grievous service of thy father, and his heavy yoke which I have put upon you, and we will serve thee"; this was the condition on which the Northern Tribes offered to pledge their loyalty to the new king. The king was not ready to answer the people, and asked them to wait and return in three days' time.

Rehoboam's first mistake was in waiting for the advice of any one. His own heart should have told him that the request of the people was just and right, and instead of asking for three days' delay he should have answered at once, "I will make your yoke lighter." How the people would have made the valley ring with their shout of "Long live the King!" It is always a mistake to consult others about a plain duty.

2. The King's Good Counsellors, verses 6, 7.—"What shall I answer the people?" Jeroboam asked of the men of experience, the elders of the people who had been in Solomon's service. "If you will yield to the people's will for the present," they replied, "and will do their will and open up well to them, they will become your servants for ever." They seem to counsel fair promises rather than actually fair dealing, yet they certainly advocated conciliatory measures.

3. That is the best government which desires to make the people happy, and knows how to make them happy."—Maculay.

### Naval Men Excluded From Active Politics

#### Cannot Make Any Speeches Or Serve On Committees

Naval men will be virtually excluded from active politics by a new order issued by the Admiralty.

The order forbids any naval officer or man to make an address to electors or in any manner allow himself to become a candidate for Parliament. The prohibition applies also to the Parliament of Northern Ireland, the Free State Dail and the Malta Parliament, and forbids speaking or appearing on the platform at political meetings or serving on election committees.

It is provided that naval officers must seek permission from naval authorities if they wish to enter the political field.

The mortality of pigeons has been markedly reduced as a result of the introduction of clay targets. Why not clay pedestrians?

It is estimated that \$200,000,000 worth of automobiles are stolen annually in the United States.

### Invade Railroad Field

#### Number Of Women Employees Is Rapidly Increasing

The rapid advances that women have made numerically into railroad-ing during the past seven years is signalized in figures published in the Illinois Central Magazine. It reports that in the period under review the number of women employed on Class 1 steam railroads has increased more than 50 per cent. They now constitute one-third of the total staff. Their number in 1926 is given as 61,302.

Women were employed in almost every branch of railroad service last year, including two in train operation and 290 in shopwork, but the most numerous class was naturally that engaged in clerical and semi-clerical occupations, accounting for 51,127, the magazine reports. The next largest class in 1926 was that employed in cleaning, namely, 3,322; other large figures being "personal service" (waitresses, landresses, etc.), 1,814, and telegraph and telephone operators, 1,427.

### CHOLERA, CRAMPS, PAINS IN THE STOMACH RELIEVED BY

Mrs. D. Leavitt, Rock Bay, N.B., writes: "Last summer my children were very ill with cholera and suffered severely from cramps and pains in their stomachs. I used several remedies, but nothing seemed to do them any good. A friend of mine told me to try Dr. Fowler's Strawberry Brand. I got a bottle and gave them a few doses and they soon found relief. Now I will never be without it in the summer months."

Don't Accept a Substitute

This preparation has been on the market for 30 years; put up only by The T. Milburn Co., Limited, Toronto, Ont.

The only thing in the four Gospels to which Hindus invariably take exception is the killing of the fattest calf. This is because they regard the cow as sacred.

The more lawn some people have to mow the more they borrow the mower.

## STRONGER URGE FOR REDUCTION IN ARMAMENTS

Geneva.—That competitive armaments create an atmosphere of war and that reduction of armaments must be doggedly fought for and achieved was the outstanding feature of the addresses at the League of Nations assembly.

The Japanese delegate Minichiro Adachi said Japan ardently desired that ruthless competition in armaments should be brought to a standstill and lowered to a level strictly essential to national security. He pledged his country's co-operation with the League's preparatory disarmament committee, which another speaker, Erich Lofgren, Foreign Minister of Sweden, insisted, was useless to convince once before the great military powers settled the divergencies of views which had appeared at previous meetings of the commission.

M. Lofgren criticized the council of the League for its passive attitude on political problems in the past year, alluding, it is believed, to the controversy between Italy and Jugoslavia, and showed no terror of the great powers when he scolded the practice of certain members of the League in discussing burning political questions among themselves.

After declaring the old pre-war methods were still in vogue, Felix Cilecia, Foreign Minister of Latvia, warned the assembly that the military budgets of 1926, including naval and air forces, amounted in Europe to one billion and a half dollars, about the same as in 1913, and that the aggregate number of soldiers more than three million, was only slightly less than the figure for 1918.

Moreover, he remarked, the technical equipment of armies was far more developed than before the great war.

"We are living under the conditions of armed peace which prevailed before the war," he declared, "and under a system of competitive armaments which many of us believe will sooner or later land the world into war."

## Fire Prevention Week Begins October Ninth

Proclamation Contained in Extra Edition of Canada Gazette

Ottawa.—An extra edition of the Canada Gazette contains a proclamation appointing the week commencing October 9 "fire prevention week" and calling upon citizens of the Dominion to inspect their premises. Fire drills are called for in schools and institutions. By Scout leaders are asked to give special instruction, teachers and municipal officials are asked to give training in fire prevention in the school and publicity is asked for legislation and regulations pertaining to the question.

The preamble to the proclamation states that the average annual loss of insurable property exceeds \$40,000,000 and that 300 persons annually lose their lives as a result of fire.

## Pioneer Of West Dead

Captain Bruce Griggs Brought Early Settlers Into Dominion

Winnipeg.—Capt. Bruce Griggs, one of the most picturesque figures of the Red River settlement frontier days, is dead in Seattle, Wash.

Capt. Bruce was one of the pioneers connected with the steamship transportation system between the Northwestern States and Canada, bringing many settlers into the Dominion previous to the completion of the first transcontinental railway line. He was 72 years of age.

## Starts Aerial Mail Service

Montreal.—Canada's first attempt to start an aerial mail service was made September 7, when Major Tudhope, of the Canadian Aerial Service, hopped off from the Canadian Vickers yards at Mississauga aboard a Vickers biplane for Father Point, where he made arrangements to take mails off the Empress of France when the liner was in the St. Lawrence waterway.

W. N. U. 1928

## French Grateful For British Sympathy

Have Presented "Golden Book" To Chamberlain In Appreciation

Paris.—For months French artisans and statesmen have been busy preparing a "golden book" which has been presented by Foreign Minister Briand and other Government officials to Sir Austen Chamberlain and Clemenceau, respectively.

The Minister of Foreign Affairs explains the motive of the gift—gratitude of France for British sympathy and aid. The Premier stresses the importance to world peace of Anglo-French co-operation and at the same time expresses French admiration, sympathy and affection for Britain.

The book contains views of the most interesting states in France and the Colonies and is autographed by outstanding French statesmen, soldiers and diplomats.

## Demands Repeal Of Trades Union Act

Alternative Set By Congress Is Resignation Of Baldwin Government

Edmonton.—The Trades Union Congress in session here, replying to Premier Baldwin's appeal for industrial peace, carried by general acclamation a resolution demanding the immediate repeal of the Trade Unions Act (restricting certain trade union activities) and failing this, urging that a general election be called immediately.

The resolution emphasized that workers were desirous for industrial peace. It said, however, that peace was hindered by the government's industrial legislative policy, its attacks on the workers' wages, its action in lengthening the miners' hours of work and the "deliberate class bias displayed in trade disputes and in the Trades Unions Act."

## Might Be Message From Distressed Plane

Carrier Pigeon Found Near Mission City Bearing SOS Message

Mission City, B.C.—Bearing the letters SOS and the figures 0022 on a metal band upon its leg, a carrier pigeon, which, it is supposed, may have been freed from a distressed plane or ship, is at the ranch of I. Erickson, farmer, living at Silver Hill, seven miles from here.

The bird, and another carrier pigeon, alighted at the ranch in an evening, and very thin, as though they had flown a considerable distance. One of the pigeons flew away again.

## Abandon Search For Fliers

Hope Of Finding Trace Of Missing Solo Aviator Has Vanished

San Diego, Cal.—The last hope that searching American war craft would find some trace of the seven missing Hawaiian fliers apparently vanished as the scout cruiser, Omaha, flagship of Rear Admiral Luke McNamee, and six destroyers rested here on their arrival from Honolulu after searching an area of approximately 450,000 square miles in vain.

Admiral McNamee reported that not a single trace of the missing fliers was discovered.

## Leave For Hudson Bay

Montreal.—Following upon the departure of the Canadian government merchant marine steamer, Canadian Raider, for Hudson Bay, via Sydney, N.S., where a cargo of coal will be loaded, the department of railways and canal has dispatched the seagoing tug, Ocean Eagle, to Hudson Bay. The tug was formerly the St. Arvans of the Saint John Drydock Company. It is not known how long the Ocean Eagle will remain at Port Churchill.

## Would Extend Organization

Guelph, Ont.—Discussion of a concerted effort just now getting under way to incorporate all employees of the different branches of the postal service clerks, railway mail carriers, porters, letter-carriers and all others—into one body featured the third annual convention of the Dominion Postal Clerks of Ontario, held here.

## Wins Prize For Coinage Design

J. E. H. MacDonald, Toronto, Ontario artist, who won the \$1,000 prize in the Dominion-wide competition for the best designs for Canada's new nickels and quarters. The new coinage will mark the Diamond Jubilee of Confederation.

## More Grain Through Vancouver Port

Reduction In Rate From Calgary Will Increase Shipments

Vancouver.—The recent order of the Dominion Railway Board reducing to 20 cents the rate on export grain from Calgary to the Pacific coast means that the movement of grain through Vancouver this year will jump to 75,000,000 bushels, said G. G. McKee, addressing the Vancouver South Federal Liberal Executive.

"The order is a guarantee of that, if it is carried out," said the freight expert of the Provincial Government. "And," he added, "that means Vancouver will become one of the greatest grain ports in the world, third or fourth."

British Columbia still had a complaint, however, he asserted, pointing out that the rate on the 968 miles haul to Quebec City had been placed at 18 cents, while that for the 642 miles haul to Vancouver was 20 cents.

"We don't care what the rate to Quebec is," Mr. McKee exclaimed. "We don't care how low it has to be to help Quebec to get the business away from New York. But Vancouver wants the same treatment. Vancouver is just as much in competition with New York as is Quebec."

## Canadian Heads Committee

Geneva.—Hon. Raoul Dandurand, Canadian Senator, has been appointed chairman of one of six committees appointed by the Assembly of the League of Nations. Senator Dandurand is chairman of the committee which deals with the following subjects: Alcoholism, economic conference and the work of the various organizations of the League of Nations.

## Lowest Birth and Death Rate

London.—The lowest birth rate ever reported in England and Wales, except in war time, is shown by the report of Sir George Newnes, chief medical officer of the ministry of health, for 1926. There were 694,000 births and 453,000 deaths. The latter also was the lowest ever recorded. The 1925 report shows 710,532 births and 473,908 deaths.

## Return From Visit To England

Hon. J. E. Brownlee, premier of Alberta, and Mrs. Brownlee, recently returned from England. In this photograph, taken on the White Star liner Regina, on which they returned, Mr. and Mrs. Brownlee are shown on the right. Other members of the group who came back on the Regina, are, from left to right: A. J. McPhail, president of the Canadian Co-operative Wheat Producers Association, Mrs. McPhail, and Mrs. D. L. Smith.

## Stripped Of Aviation Honors

French Flier Charged With Falsifying Report Of Altitude Record

Paris.—Jean Colville, who gained fame as an altitude flier, stands disgraced and stripped of his honors. The sports committee of the French Aero Club after a hearing on the charges that he falsified the barograph records of his latest record-breaking attempt, decided that they were fully proved.

It inflicted the severest penalty within its power—disqualification for life—and struck from its list the previous records with which he was credited.

The French altitude record, by virtue of the club's action, now goes to Sadi Lecolte and the world's record to former Lieutenant J. A. Macready, of the United States army air force.

The charges against Colville, as published in the French press, were that he inserted on his barograph a sheet on which a curve had already been plotted in invisible ink to indicate a record-breaking flight of 12,500 metres, or 38,704 feet. It was alleged that after taking off for the purported attempt he shot steam against the paper, thus making the ink legible and subsequently submitted the sheet as proof of his record-breaking claim.

## Germany Affected By Polish Tariff

Hit Harder Than Other Countries By New Ruling

Warsaw.—Customs tariffs will be increased by 100 per cent, effective in four months, to all countries not protected by trade treaty with Poland, an official bulletin announces.

The ruling will hit hardest Poland's western neighbor, Germany, with whom negotiations for a commercial accord have been in progress five years without result.

One of the difficulties preventing the conclusion of a Polish-German agreement is Germany's insistence that Poland deport no German citizens now residing on Polish soil.

Several other points, also foreign to trade, are causing delays, through the two governments are practically agreed as far as commerce itself is concerned.

## Will Of J. Ogden Armour

Left An Estate Valued At One Million Dollars

Chicago.—The will of J. Ogden Armour, who once was worth an estimated \$200,000,000, was filed for probate and disposed of an indicated estate of \$1,000,000.

The will left \$1,000,000 outright to his daughter, Lolita, now Mrs. John J. Mitchell, Jr., and an annuity of \$12,000 to her husband.

The remainder of the estate, except for a few minor bequests of from \$1,000 to \$5,000 to servants, was left in trust for the benefit of the widow and daughter.

## Predict Early Winter

Leveled Col.—Two flocks of wild geese have been seen flying South for the winter. The early appearance of the birds, which usually do not migrate until Fall, has led to predictions of an early and severe winter. Sportsmen fear the geese will be gone before the hunting season opens.

## Against Communist Party

Haltersburg, Germany.—The Pan-German League, which is holding a convention here, has adopted resolutions, demanding the dissolution of the communist party and the suppression of its organs. The league represents the nationalistic extremists.

## DOMINION HAS DEVELOPED A MARKED IDENTITY

Vancouver.—There can be no question of the existence of distinguishing characteristics which give to Canada a marked identity of her own among the nations of the world, Sir Robert Falconer, president of the University of Toronto, said here, addressing the Canadian Club on the subject, "Elements of Canadian Nationality."

"All across Canada the pronounced characteristics of the people are more and more apparent," the speaker said. "And there is unity everywhere. No matter where one travels in Canada one feels at home, but when you cross the line into the United States there is not the same feeling."

Sir Robert credited the Maritime provinces with being responsible for the Canada of today. He said if there had been no Maritimes there probably would have been no British Canada. The founding of Halifax in 1749 was one of the most strategic moves ever made by Great Britain. He also gave credit to the United Empire Loyalists for playing an important part in laying truly the foundations of the Dominion.

"Halifax held Nova Scotia and New Brunswick loyal," said Sir Robert, "and the Maritimes always must remain a very important part of Canada."

The speaker told of the "extreme difficulties which the early British settlers in Canada met. However, these conditions bred men of resource and adaptability."

Sir Robert dwelt on the question of the French in Canada, commenting upon the difficulties encountered through two centuries of two peoples living side by side. The wonder was that there was not more trouble in the early days. As time progressed the two had come to know each other better, an element of tolerance had developed and there was a better feeling today than ever before.

## Trying To Adjust Immigration Rules

Change Would Simplify Problem Of Canadians Working In Border Cities

Toronto.—The Toronto Mail and Empire publishes the following dispatch from Washington:

"A new program of amendments to immigration and naturalization laws is being worked out by experts in the Labor Department in anticipation of action upon that subject in the next congress."

"Secretary of Labor Davis, returning today from an inspection of border operations, outlined his plans to his assistants and announced that immigration in the future, if he has his way, will be on much stricter basis."

"Changes in the law to be proposed include: Revision of quota laws so as to smooth out present difficulties with Canada and permit Canadian aliens to work in American border cities, such as Detroit and Buffalo, without undue hardship."

## John Oliver's Will

Vancouver.—Probate was granted in supreme court by Mr. Justice Morrison of the late Premier John Oliver's \$11. In a four-page document executed July 15 last and signed "Hon. John Oliver," the testator disposed of a gross estate of \$75,918, which is subject to liabilities of \$519, so that the net valuation is \$75,402. Mr. Oliver died August 17 at Victoria. The widow, five sons and three daughters are the sole beneficiaries.

## Two Killed In Collision

Calgary.—Two fatalities were killed, one passenger injured, and more than a score suffering from slight bruises and shock, when C.P.R. passenger train No. 1 and west-bound No. 2, the Imperial Limited, met in a head-on collision at 11:45 a.m., 45 miles east of Calgary, on the main line.

## Against Communist Party

Haltersburg, Germany.—The Pan-German League, which is holding a convention here, has adopted resolutions, demanding the dissolution of the communist party and the suppression of its organs. The league represents the nationalistic extremists.

## Hunting Army to Invade North Woods

THE SHOOTING STARS

The enormous increase in the sport of deer hunting has resulted not in the vanishing of the deer but in the increase of deer. This is not as mysterious as it sounds. The more men penetrate the wilds the fewer wolves remain. The driving out of wolves has been the greatest factor in the increase of deer. But there is another factor almost as important as the wolves. The invasion of the backwoods by an army of enlightened sportsmen has demanded a much stricter and more sporting regard for game laws than was the custom some years ago. Destroyers of deer whether human or animal, have to deal with a strong and more or less organized public opinion.

**Good Hunting News**  
Reassuring news has been coming in daily to the offices of the general tourist department of the Canadian Pacific Railway Company from operators of camps, guides outfitters and others who report that all signs point to an unusually promising hunting season for the current year.

Mike Bates sends down word from his camps at Metagama, Ontario, that if the hunters don't get their deer and moose this season they'll have nothing to blame but their poor shooting. He says that moose are very plentiful and expects it to be a great year in every way.

From Schreiber Ontario where John Handel, outfitter has been operating the reports are just as reassuring. Handel reports that the game has increased in the Superior Game Re-

CALLING THE MOOSE

serve, south of the C.P.R. line and the surplus has crossed to the north of the tracks offering good hunting. He says that caribou are roaming the woods in increased numbers, and as the C.P.R. line is the north boundary of the game preserve hunters don't have to go very far for their quarry. The news from Sheehan's camp at Lake Penage south west of Sudbury is also music to the hunters ears. Deer here are reported to be very plentiful and sport should be excellent.

Reports turned in by guides of the Ogilvie Bros Camps on the Tobique River, N.B. are to the effect that deer, though very plentiful last season, show signs of much greater increase. The same word comes from A. D. Thomas, at South Milford in the Kedgemokeogee district.

**Living Sights.**

Should you follow the deer with your sights or set your sights ahead of the deer and let him come on them? Well, the army training which men got overseas taught them to consider the second system the better. Lewis gunners firing on moving targets were taught to throw a burst ahead of the mark, to see where it struck, and then let the target move onto the line of fire. Trying to follow a jumping deer in all its excited movement is harder, probably, than trying to guess a spot that the deer will pass—say an opening in the brush on which to have time to lay your sights sharp and true. For casual shooters to get a little practice with their rifles a method of letting the deer run on sights already set is regarded as the most successful.

TO THE VICTOR THE SPOILS

AUCTION SALE OF TIMBER  
BERTH COVERING DOMI-

ION LANDS.

## Here and There

The apple crop this year will run  
to 1,500,000 barrels, according to W. C.  
B. Chassey, of Wolfville, or a fifty per-  
cent increase over last year, while the  
crop of the other fruit is reported only  
half that of last year.

The Department of Lands and  
Forests of the Province of Quebec  
have planted 1,000,000 trees this  
year—a record figure and nearly  
double that of last year. Next  
summer it is proposed to plant  
2,000,000 trees.

Canada's net debt decreased by  
\$52,498,429 during the first four  
months of the fiscal year. It now  
stands at \$2,205,335,840. During  
the corresponding period of last  
fiscal year there was a decrease of  
\$11,351,655. Both revenues and  
expenditures show increases.

Tourist travel this season is in  
excess of previous years and is even  
more cosmopolitan in its derivations  
than formerly, according to C. E. E.  
Usher, general manager of the  
Canadian Pacific Railway. He says  
that the company's interests at  
Banff, Lake Louise and other  
favored tourist spots.

E. J. Chambers, President and  
General Manager of the Associated  
Fruit Growers of British Columbia,  
states that British Columbia apples  
are now being sent to South Africa,  
China, Sweden, Norway, Germany  
and Denmark, as well as Great  
Britain, the heaviest market. New  
York and Chicago are big consumers  
of two varieties, the McIntosh Red  
and Delicious, respectively.

A further party of 40 students  
representing many colleges in the  
British Isles arrived at the Cana-  
dian Pacific steamship Montrose  
and proceeded to the harvest field  
of Western Canada in the care of  
the C.P.R. Department of Coloniza-  
tion and Development. They will  
be placed upon farms in Saskatch-  
ewan for the duration of the har-  
vest by the British Women's Immi-  
gration League.

Construction of the first commer-  
cial fish hatchery in Alberta will be  
started in September, announces R.  
T. Rodd, Dominion Fisheries In-  
spector. It will be located at the  
mouth of Canyon Creek, on the  
south shore of Lesser Slave Lake.  
It is estimated that 100,000,000  
whitefish will be propagated at  
the hatchery every year to maintain  
an undiminished supply of fish for  
the many companies operating in  
the lake.

So great is the interest which is  
being evidenced in the Scottish  
music festival organized as part of  
the Highland Gathering for Banff,  
September 3-5 that the Canadian  
Pacific Railway has arranged with  
the Alberta Government, telephone  
to install the amplifiers of the public  
address system that were used at  
the Diamond Jubilee broadcast, so  
that the evening concerts will be  
heard not only in the ballroom of  
the Banff Springs Hotel, but also in  
the lounges and in the open air on  
the terrace.

General industrial transportation  
and agricultural output (from re-  
ports reaching him from all parts  
of Canada) is excellent and will  
continue to improve the market  
for Canadian products widens, said  
E. W. Beatty, K.C., chairman and  
president of the Canadian Pacific  
Railway, recently at Calgary. "An  
important factor in the latter will  
be a steadily increasing population,"  
he said. "The transportation com-  
panies, of course, only reflect the  
general conditions of the country,  
and compared with last year, their  
gross earnings are higher, but in-  
creased costs beyond their control  
have resulted in lower net earnings."

The self-stropping feature  
of the AutoStrop Razor  
makes the blades last long-  
er by preserving the edge  
that makes shaving com-  
fort possible. 500 shaves  
from 12 blades.

Razor — Strop — 12 blades — 95

**SUMMERFIELD & MAYER.**

### Stony Plain and District.

Meredith Bros. are planning a big campaign for barnyard fowl the coming season. When yours are ready for market, let them know.

Inga Councillors' next meeting will be in Stony Plain on Friday, Sept. 23.

Mr. E. F. Guest of Barrhead, bridge contractor, last week finished a new structure near the Emil Hennig farm, on the road down from St. Matthew School. Another bridge was installed south of Mr. August Burger's residence, at Holborn. The outfit is at present working on a new bridge six miles south of Larue's store at Winterburn, on the road to Woodbend. It is understood these have been constructed under the auspices of the Provincial Highway Commission.

If your eyes bother you, or you suffer from headaches, why not have your eyes attended to by an expert? M. M. Mecklenburg, eye specialist, will be in Stony Plain Thursday, Oct. 6th.

### Left Jabs and Right Hooks

After the scare over the small fire Saturday evening had subsided, proceedings on Main street were enlivened somewhat by the not unexpected encounter between Mike and Tony. The preliminary gabfest was none too plain to the Sporting Editor, but when they began exchanging straight lefts and right hooks to the jaw, we didn't need any interpreter. What Tony lacked in size, he made up in sprightliness, and he was here—there—everywhere, delivering blows; so much so that at times Mike thought he was fighting twins. After watching the sport for awhile, the crowd separated the contestants.

### Building Notes.

Bob Stoker is at present engaged in plastering the new bungalow for Henry Sinner, on Meridian road. Contractor Anderson is on the job, and is putting the finishing touches on this nice piece of work, and one which does credit to the town.

Contractor Karl Strass has the job in hand of erecting the new residence for Mr. A. E. Michael.

Residential property in town is still at a premium, owing to the constant demand for houses by those who wish to take up their residence here.

### Wheat Pool News Notes.

The Alberta Wheat Pool is not operating a coarse grain pool this year. Blank coarse grain contracts have been sent out and if a sufficient acreage is signed a coarse grain pool will be operated next year.

By the time the bulk of the wheat is moving in Alberta this fall, the Alberta Wheat Pool will have 155 line elevators completed and in operation.

Yukati Shirari, of the Japanese firm of Mitsubishi Shoji Kaisha Ltd., Seattle, Wash., was a visitor at the Alberta Wheat Pool office in Calgary recently. He evinced a great deal of interest in the organization.

### Farewell to Concordians

On Sept. 7th a large host of Walther Leaguers gathered at St. Matthew School No. 1 to bid our young Concordians who left for Concordia Seminary, St. Louis, and those who are about to leave for Concordia College, Edmonton, a hearty farewell.

The party started with a speech by Rev. H. J. Boettcher emphasizing mainly the good and honorable work our young men are preparing themselves for.

Games were played in which everybody took a keen interest. Following this, lunch was served.

Director A. H. Schwermann gave an interesting talk on the "Good Progress" our students have made who left for the States two years ago.

The happy meeting was then brought to a close by singing "God be with you till we meet again."

### Spruce Grove News

A story is current that Mr. John J. Metcalf, who has so efficiently served as a weeds inspector for Spruce Grove M.D. this season, has (or will be) summoned to court, on a charge of failing to do his duty as a weeds inspector. Speculation is rife as to the identity of the party or parties who started the action.

Mr. M. Zucht, who has had the contract for raising the grade crossings in this district, has had a big job on his hands at the crossing at the Logg Church. His gang spent a week here.

Several of the local enterprising threshers expect to have their machines running the latter part of next week.

The local school re-opened Tuesday, after being closed for a short time owing to the infantile paralysis scare.

### Child Lost at Golden Spike

A call for help to find a lost child came to the local Police detachment at noon on Monday last. The call came from Geo. Schultz, at Golden Spike, whose 2-year old girl, Violet had wandered off.

Officer Smith responded, and organized search parties.

The youngster was out in the harvest field with its mother and sister, and quite unnoticed toddled off.

After the parties had been on the search for a couple of hours, the missing youngster was found asleep under a bush on the adjoining farm of Carl Seiwitzer, having wandered about half a mile before being overcome with sleep.

### This is Chevrolet Year.

On Thursday last Sommerfeld & Mayer received another consignment of Chevrolet coaches and sedans. These were practically all taken out as soon as the finishing touch was put on, all having been on order for customers. These are the popular motor vehicles at present, the showy appearance and the good value given serving as a big inducement to prospective auto purchasers. Constable Smith has acquired one of these nobly and serviceable coaches for use in his business.

### Holborn Happenings.

Holborn United Farmers cut and staked 65 acres of grain for Wm. Hopkins on Sunday last.

Mr. Hopkins and family returned from Rochester just as the gang was finishing up.

Mr. Hopkins will be unable to do any work for some time, so it was decided the threshing would be done the same way.

Government Liquor Control Act of Alberta.

## Application for Beer License.

Public Notice is hereby given that the undersigned intends applying to the **Alberta Liquor Control Board** for a License to sell Beer by the Glass, or open Bottle, for consumption in conformity with the provisions of the Government Liquor Control Act of Alberta, and Regulations made thereunder, with respect to the following premises:

Duffield Hotel; beer saleroom to be situated in the northwest corner of said premises, on Lot One situated on the Northwest Quarter of Section 26, Township 53, West of the Fifth Meridian, in the Village of Duffield.

DATED at Duffield, Alberta, this 4th day of August, 1927.
